

THE COMPANY

Alltech E-CO₂ is a leading provider of food & farming sector environmental and carbon assessments. The food supply chain is under more pressure to reduce its environmental footprint and requires support in achieving this difficult objective. Alltech E-CO₂ are currently working for large companies such as the Co-operative, Tesco and Arla Foods.

Alltech E-CO₂ is looking to add to the team following an expansion into new global territories. You will join the Technical Team within the company which supports the development and delivery of our services and advisory tools domestically and overseas.

THE ROLE – Senior Sustainability Specialist

The successful candidate will lead the management, maintenance and development of sustainability and LCA models used by the business to appraise environmental and economic performance of food producers worldwide. The preferred candidate will help to update existing models in line with the latest research and maintain the accreditations that we operate within alongside furthering the knowledge of field level client facing and on-farm teams within Alltech E-CO₂.

The role would suit someone leaving postgraduate studies or someone with a few years' industry experience, and would provide significant creative freedom to develop tools, calculations and ways of working (in different sectors) meaning the successful candidate can really make their mark.

The Specialist may be expected to represent the interests of Alltech E-CO₂ or its global parent, Alltech (or subsidiaries) and its customers in academic circles and address academic audiences and build up academic links between Alltech E-CO₂, Alltech and research institutions.

The successful applicant will take a senior role within the company by managing junior staff and making business decisions to support the Alltech E-CO₂ Business Manager.

The successful candidate may be called upon to undertake LCA studies on products manufactured by the parent company across sites around the world in the fields of; animal feed, aquaculture, brewing and distilling to name a few.

When called upon the successful candidate will help position the business regarding social media responses to topical sustainability issues.

The role will be based at the Alltech office in Stamford, Lincolnshire, UK although successful applicants will need to be open to travel to relevant meetings and training events both in the UK and overseas when required as we expand our services into new territories.

You will be allowed the flexibility to leave a positive, lasting mark on the business and within the global parent, Alltech, an exciting multi-billion dollar company which operates in over 128 countries.
